Learning Outside the Classroom (LOC) Form

Instructions:
As described in your syllabus, you are required to:
• perform 2 hours of Research-based activity for LOC-R credit
• attend 1 Public presentation for LOC-P credit

When to use this form. You should use a copy of this form each time you complete some part of the LOC requirement for Psychology 101. Fill one of these out when you have completed a study (for LOC-R), when you have read an article (for LOC-R), or when you have attended a public presentation (for LOC-P).

What to do with completed forms. Give completed LOC forms to your Psych 101 professor. Some professors will want you to turn forms in throughout the semester; others want you to turn in all forms at the end of the semester.

What did you do?

___ I participated in a research study (LOC-R)

What was the title of the study? ________________________________________________

How long did the study take?

___ less than 30 minutes ___ 60 to 90 minutes
___ 30 to 60 minutes ___ more than 90 minutes

___ I read an article from the Psych 101 LOC-R reserve list in the library (1 article = ½ hour of LOC-R unless otherwise specified on the article). A book of eligible articles may be found under “Psychology Department” at the library reserve desk.

What was the title of the article?

___ I attended a public presentation (LOC-P)

What was the title of the presentation?

Where and when did the presentation occur?

Fill out the next page
In the box below, describe your LOC participation.

- If you participated in a study, describe what you did in the study and describe the study’s goals (use the debriefing information from the experimenter as a guide). Link the study to your course in psychology.
- If you read an article from the Psych 101 LOC-R reserve list, summarize the article in your own words and give your reaction to the article. You may attach a typed summary if you wish.
- If you attended a public presentation, describe the presentation, give your reaction to it, and explain how this presentation is related to psychology or to course material. If your presentation was not directly related to psychology, explain how the presentation addressed the human condition in some way (defend how this presentation seems relevant for a course in psychology). You may attach a typed summary if you wish.

I pledge that I have participated as I have described, and that I have not copied this description from any other source.
