

Bubbl.us

Visit <http://www.bubbl.us/>

Create an account.

The first bubble (the "parent" bubble) will appear in your new account. Name the file and save it.

Click lower left of bubble to change color.

Middle right creates a sibling (equal). This bubble, if created from the parent, does not need to be connected.

Click on bottom middle to create a child balloon.

Lower right click connects one bubble to another with a directional arrow. The arrow will point away from the bubble you click on first.

Click on X to delete a bubble.

Upper right moves the bubble.

Choose undo in the upper left of the screen to back track.

To save your work, you need to create an account.

One way to share your idea map is to invite a friend. First you have to create friends. Click on Friends and follow the instructions.

Once you have a list of friends, you can invite them. Click on My Sheets, choose the file you want to share, then click on Sharing and following the instructions.

Another way to share is to click on the Menu icon and choose Export, saving the image, then sending it as an attachment to someone via email.
