

# STUDY ABROAD IN LONDON

## SPRING 2017

Cluster

London: A (Post)Global City

Semester @ Goldsmiths, University of London

---

HST 2XX: History of Travel, Tourism, and Migration (HU, DE) – Dr. Cathy M. Ouellette

SOC 2XX: Sociology of Travel, Tourism, and Migration (SL, DE) – Dr. Janine Chi

The cluster utilizes a socio-historical approach to examine the rise, current dynamics, and future of global cities. Using London as a case study, students will learn about various issues facing “developed” global cities, including that of changing patterns of migration, settlement, and adaptation. In particular, we will seek to understand the relationship between postcoloniality and globalization by examining the role of immigrant “ethnic” communities within the local socio-economic and national political landscape.
